Genetics Building
Madison 6, Wisconsin

July 1958
form letter

Dear Jim:

I thought you might be interested to hear that I have accepted a chair in a newly organized Department of Genetics at the Stanford University School of Medicine, Stanford, California. We plan to move our laboratory there in July 1959 (in company with Arthur Kornberg who will head the Department of Biochemistry.)

According to present plans we will remain here until then except that we will be away in Europe during August 1958 and possibly April-June 1959 (with Dr. L. Cavalli-Sforza, Institute of Genetics, Via S. Epifanio 14, Pavia, Italy). Correspondence addressed to Madison during these intervals can be readily forwarded but will be expedited if instructions to 'Forward!' or to 'Hold!' are marked on the envelope.

Yours sincerely,

Joshua Lederberg
